Electronic & Electrical  
Engineering Society

Sponsorship Brochure

## Sponsorship Opportunities

As a sponsor you would have the opportunity to establish a dialogue with this growing group of engineers as they mature and begin to consider their options beyond university. The society will give you a platform on which to engage these students: through promotion at numerous events, on our website and via our social media platforms, as well as offering the chance for your representatives to come and address them personally. Our department and society are well represented throughout the university and we can guarantee that our sponsors are recognised well beyond the faculty of engineering.

We are currently looking for sponsorship so that we can improve and expand our larger events. At their current size the Chinese New Year Burns Night costs the society £2000 and our Graduation Ball costs around £5000. Subsidising these events would make them more accessible and undoubtedly attract more members. Similarly we are looking to fund our range of charity events so that all proceeds can go directly to our chosen causes.

# Foreword

The aim of Strathclyde University's Electronics and Electrical Engineering Society (i.e. the EEE Society.) is to encourage the growth of a body of professional and sociable prospective engineers from all walks of life. By hosting charitable, industrial and social events throughout the year we hope to give our members the chance to expand their horizons beyond the lecture hall.

Additionally, after only 1 year of re-establishment the society has been nominated for both Best Course Society and best Society Event at Strathclyde.

# The Committee

# Our Events & Activities

## Academic Events

We host a wide variety of trips and activities for students, such as providing several free psychometric testing sessions in October. At least once a semester, the society visits notable engineering sites including Whitelee Wind Farm and underground tours of Glasgow Central.

## Cultural Events

Due to the 2+2 program providing the course with a large number of Chinese students, we provide an opportunity for the course to bond together and discover new cultures with the Chinese Burns Night celebration each year. In addition, this year's event has set the record for the largest ever event hosted by students at the Strathclyde Union.

## Charity Events

Every year, the EEE society has hosted a Poker Tournament to raise funds for the Gambia Solar Energy Project, providing sustainable energy solutions to communities within The Gambia. We also host a Christmas Pub Quiz and 5-a-side football tournament for charity.

## Social Events

Halloween and Easter Pub Crawls are held, allowing students to take refuge from their studies temporarily and relax. We also regularly host social nights at our sponsored bar, allowing members to socialise and speak with their peers between years of the EEE course.
